

The Janis Group (JGI) partners with Avnet Technology Solutions to provide Oracle's Business Applications Software to Small and Medium Sized Businesses.

Powerful combination of companies, technology and professional services brings world-class business solutions to customers in North America.

ROCHELLE PARK, NJ; April 20, 2006 – The Janis Group, Inc. (JGI), an Oracle Certified Partner and leading Enterprise Resource Planning (ERP) Value Added Reseller (VAR), today announced that upon becoming an Avnet Oracle Application Alliance VAR, the company has extended its partnership with Oracle through Avnet Technology Solutions to provide and support Oracle's award-winning product offerings for the Small and Medium-sized Business (SMB) segment.

JGI, in partnership with Avnet and Oracle, offer a unique approach to helping small to mid-sized businesses successfully implement new ERP systems. Oracle's world-class technology, Avnet's Global resources, technology and management experience, and JGI's local presence and industry specific experience combines to provide high value for pre-sale, purchase and post-sale services. The services include: Implementation Services, Application Consulting, Technical Consulting, and Training for Manufacturing, Distribution, Financial, CRM and HRMS systems. Avnet's Oracle Application Alliance VAR's attend both sales and technical product training on Oracle business applications to enable consistent local, on-site value to ERP customers.

"Having strong local partners who understand the business needs of their clients and who can present Oracle Business Applications is essential to the growth of our company," said Scott Abbott, Vice President of Avnet Technology Solutions. "We are excited to have JGI join our Oracle Application Alliance. The success of this Program is key to the continued rapid growth of ERP sales at Avnet and Oracle."

"At JGI our mission is to deliver high impact business solutions to our clients – on time and on budget. JGI drives business value by helping companies nationwide implement, improve, and integrate systems and processes, delivering superior technical skills, vendor specific expertise, and business process optimization. We are excited to be a part of the Oracle Application Alliance."

- Michael Janis, CEO, The Janis Group

Designed to meet the specific needs of SMB customers, Oracle's Business Applications enable companies to manage all key business operations in a single, integrated system, including Customer Relationship Management, Sales Management, Financial Management, Order Management, Manufacturing, Inventory Management, Service and Support, Reporting and Analysis. Oracle's Applications for small and mid-size businesses deliver enterprise-class applications to the SMB Market at a scale and price that meets their needs. The solution can also be delivered as an on-demand service to provide lower initial costs and faster implementations.
