

JGI Signs PeopleSoft Upgrade Agreement

Major U.S. Workforce Solutions Company Contracts JGI for HR, Benefits & Payroll Upgrade

Rochelle Park, NJ – July 12, 2007 – JGI, a Professional Services firm specializing in Enterprise Software Applications and Business Intelligence Solutions, today announced it has signed an agreement to provide PeopleSoft upgrade services for a major New York-based employment services organization.

Under the terms of the agreement, JGI will upgrade the customer's HR, Benefits and Payroll modules from PeopleSoft v8.3 to PeopleSoft v8.9. The upgrade combines both offsite technical work in the recently expanded JGI PeopleSoft Lab with onsite development, testing and training. As a result of the project, JGI will deliver a fully tested environment that will position their client for the next five years.

"The signing of this deal was important for us", explained JGI CEO George DiGrandi. "This project validates everything that JGI has been doing to solidify our reputation as a respected Oracle partner. Since the acquisition of PeopleSoft in 2005, we have been expanding our Oracle practice by focusing primarily on PeopleSoft applications. In the end, JGI won this deal over larger, global consulting firms due to our extensive PeopleSoft upgrade experience and the ability to combine a lab based upgrade with on site resources at off shore prices", Mr. DiGrandi concluded.

JGI will be exhibiting and presenting at the Quest Northeast User Conference slated for July 18-20, at the Mohegan Sun Resort and Casino in Uncasville, CT. The event serves the PeopleSoft and JD Edwards user-base across the Northeastern US territory. At the event, JGI will host an educational session detailing the successful upgrade and data migration that this press release profiles on Wednesday, July 18th at 3pm in the Nipmuc Room. JGI will also be exhibiting at the Oracle HCM User Group (OHUG), from September 24-27 in Las Vegas, NV.
